GRAIN RATE MANIPULATION. CHICAGO, Aug. 25.—Chairman Midgley of the Western Freight association has called a meeting of the traffic managers of the Missouri river roads for Sept. 7th, to consider charges of irregularities in freight rates. For some time it has been more than suspected that certain roads were not living up to their agreement. Evidence has not been wanting that rates were being manipulated on grain and other freight, not only from the Missouri river, but also from points beyond, and the roads that have seen their own busines fall away while that of their competitors increased have at last demanded an investigation. The principal sufferer from the alleged irregularities is supposed to be the Chicago and Alton. Complaint is especially made against the Atchison. The stories that were current several months ago concerning that road's contracts with Peavy & Co. have been revived, together with hints of other transactions of an equally shady character. living up to their agreement. Evidence

character.
Whether any direct evidence has been Whether any direct evidence has been produced in support of the charges cannot be learned, but much stress is placed upon the statement that the Atchison is doing no less than 25 per cent of the business of southwestern Missouri river points, and it could not secure and retain so large a proportion by legitimate competition. The kansas City, Ft. Scott and Memphis and one or two other lines are also included in the charges of rate-cutting.

Mr. Herbert says that the feature of the present tariff giving preferential treatment to certain routes and norts and providing for transshipment at Canadian ports only will not be readopted after the present season. This undertaking, however, will not be binding on the Canadian government in case the president of the United States should, in the mean while, proclaim and enforce the imposition of toils on the Sault Ste. I am happy to reciprocate, in the name of the president, the desire expressed in your note 'to remove any ground which has a tendency to disturb the friendly interchange of trade between the two countries,' but I beg to suggest that the present violation of treaty stipulations which were framed with an express view to the promotion of a 'friendly interchange of trade between the two countries,' does not tend to that result. Until the Canadian government is prepared to resume its obligations under the treaty, there can be found no safe basis of friendly commercial intercourse."

MAY SUCCEED BLODGETT. CHICAGO, Aug. 25.-William Ernst Mason, the ex-congressman, politician and lawyer, is to be the successor of Judge Henry W. Blodgett, of the United States district court for the northern district of district court for the northern district of fillinois. This is the substance of a telegram received from Washington. Those intimately informed as to the president's inclinations confirm the correctness of the report. The resignation of Judge Blodgett will be in the hands of the president during the latter part of October, at which time or shortly after he will assume his duties as counsel to the Bering sea commission. The appointment to fill the wicancy will immediately follow, so that the new judge may qualify for the December term of the district court. Such, at least, is the present program as told by one familiar with the situation.

The Competitive Drilling Continued - New Officers Elected.

KANSAS CITY, Aug. 25.-The competitive drilling was continued today at Expositio park. In spite of the fact that the drilling began at 9 o'clock, thousands of citizen and visitors were at the park promptly at that hour, seeking the most advantageous position from which to view the drills. Had any proof been needed that the interest they displayed was genuine, the applanse that greeted each division when its work was of special merit would have been evidence of the fact. The audience showrespondence with reference to the question of tolls on vessels passing through the St. strative and unmistakable way, and no doubt did much to encourage the competing divisions to drill as they had never
